Sirs;

The local radio industry in recent years have only given the public what it thinks "it" wants. The Washington DC area, they have taken away the the 40's/50's music station. In short they totally neglected the senior citizens. Thank goodness, some one has came along and filled the nitch. Now, satillite radio, there are two now and I subscribe to XM Radio. It is a god-send for my wife and I. Please do not do something stupid and limit its programming in any manner. I feel they have the right to program what might benefit their clientel. So think twice before you do something that would limit their programming and services.

Thanking you;  
Frederick H. Varn
